EDUCATION

SSIPMT(Raipur)

2024-2028

Bachelor of Technology – Specialization in AI and Machine Learning- CGPA - 7.98/10

Raipur

TECHNICAL SKILLS

Languages: Python (Advanced), C++, SQL, HTML/CSS

Machine Learning & AI: Machine Learning, Computer Vision, Facial Recognition, OpenCV, MediaPipe, Supervised Learning, Unsupervised Learning, Feature Engineering, Model Evaluation, LLM APIs (OpenAI/Gemini), Agentic AI Workflows

Frameworks & Libraries: FastAPI, Flask, React, Vite, NumPy, Pandas, Streamlit

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Arduino IDE

PROJECTS

Gesture-Controlled Interface (NeuralTrack) | Python, OpenCV, MediaPipe, Computer Vision

- Developed a real-time hand tracking system enabling touchless interaction through gesture recognition.
- Implemented pinch-gesture detection using MediaPipe landmarks and mapped actions across multiple interaction zones.
- [\[GitHub\]](#) [\[Demo Video\]](#)

PrithviNet | FastAPI, React, Python, AI/ML Models

- Architected an AI-first real-time environmental monitoring and compliance platform for predictive tracking.
- Integrated Machine Learning models to forecast environmental compliance breaches and hazards.
- [\[GitHub\]](#) [\[Live Demo\]](#)

Anti-Proxy Attendance System | Python, OpenCV, Flask, Arduino

- Built a biometric attendance solution using facial recognition and RFID authentication.
- Implemented OpenCV pipelines and deep learning models for high recognition accuracy.
- [\[GitHub\]](#) [\[Live Demo\]](#)

JobCoachAI | Vite, TypeScript, OpenAI/Gemini APIs

- Developed an AI-powered placement dashboard for resume optimization and job matching.
- Built agentic workflows to analyze job descriptions and generate tailored resumes.
- Implemented recursive summarization to overcome LLM token and context limitations.
- [\[GitHub\]](#) [\[Demo Video\]](#)

CERTIFICATIONS

- Build with AI Bootcamp** – Google for Developers & H2S (2026) Learned AI Agents, workflow design, and production-ready Generative AI integration.
- Build Smarter, Scalable AI Agents with UiPath** GeeksforGeeks & UiPath (2026) – Hands-on workshop on AI Agents and Automation.

ACHIEVEMENTS

- DSA:** Actively learning Data Structures Algorithms, Machine Learning, Probability Statistics, and Linear Algebra to build a strong foundation in AI Engineering.
- Problem Solving:** Solved **250+ Python problems** on CodeChef with strong proficiency in Arrays, Strings. [\[Proof\]](#)
- Competition:** Awarded **2nd Prize** in the Project Development Competition held at SSIPMT AICTE IDEA Lab (July 2025). [\[Certificate\]](#)
- Open Source Contribution:** Developed custom open-source tools including a YAML Binary Tree Utility and a Blender Add-on as part of advanced technical screenings. [\[GitHub\]](#)
