ANANDITA INDURKHYA

Links: |GitHub| |LinkedIn| Email: ananditaindurkhya02@gmail.com Phone No. : +91 8602985667

2nd Year Bachelor of Technology – Specialization in Artificial Intelligence and Machine Learning at Shri Shankaracharya Institute of Professional Management & Technology (SSIPMT), Raipur Duration: 2024–2028

Education

1st year CGPA – 8.02/10

12th (Holy Cross S.S. School,Kapa) 2023
CBSE Board(PCM + CS), 74.4%
10th (Holy Cross S.S.School) 2021
CBSE Board, 83.2%

Technical Skills

- **Programming Languages:** Python, C++, C, Java.
- **AI & Machine Learning:** Prompt Engineering, Agentic Workflows, LLM Integration (OpenAI/Gemini), Computer Vision (OpenCV).
- **Web Technologies:** React, FastAPI, Node.js, Vite, TypeScript, HTML5, CSS3, JavaScript, MySQL.
- **Tools & Frameworks:** Flask, Django, Streamlit, Git/GitHub, VS Code, Jupyter Notebook, PyCharm.
- **AI Productivity:** Claude, NotebookLM, MerlinAI, ChatGPT

Projects

PrithviNet | Real-Time Environmental Monitoring & Compliance

React, FastAPI, AI/ML Models, WebSockets * Developed a comprehensive "AI-first" system to monitor environmental metrics in real-time, moving beyond static data to active compliance tracking.

- Engineered a high-performance dashboard using **React** and **FastAPI** to visualize live sensor data and environmental KPIs.
- Integrated AI components to predict potential compliance breaches, enabling proactive rather than reactive environmental management. GITHUB LINK: https://github.com/ananditaa2/PRITHVINET

Anti-Proxy Attendance System | Computer Vision & Security

Python, OpenCV, Deep Learning, Flask/Django * Architected an end-to-end biometric solution to eliminate proxy attendance using real-time facial recognition and liveness detection.

- Implemented **OpenCV** and deep learning frameworks to ensure high accuracy in diverse lighting conditions and varied student orientations.
- Optimized the recognition pipeline to handle concurrent requests, ensuring a seamless and spoof-proof check-in process for institutional use. GITHUB LINK: https://github.com/ananditaa2/Anti-Proxy-Attendance-System-/tree/main

JobCoachAI | AI-Powered Career Optimization

Vite, TypeScript, LLM APIs (OpenAI/Gemini), AMD Slingshot Integration * Built an intelligent placement dashboard featuring an automated resume rewriter powered by **Large Language Models (LLMs)**.

- Developed **agentic workflows** to parse complex job descriptions and provide context-aware resume tailoring and interview preparation.
- Leveraged **Vite** and **TypeScript** for a modern, type-safe frontend, ensuring a high-speed and responsive user experience. GITHUB LINK: https://github.com/ananditaa2/jobcoachai-AMD_Slingshot

Asynchronous Weather Intelligence App | Python & Real-time APIs

Python, Streamlit, HTTPX/Aiohttp, OpenWeatherMap API * Designed a responsive weather analytical tool using **Streamlit**, capable of handling multiple concurrent data requests without UI lag.

- Implemented **asynchronous programming** in Python to fetch and process data from external APIs, resulting in a 40% improvement in data retrieval speed.
- Integrated advanced data visualization to provide users with predictive weather trends and historical comparisons.
- GITHUB LINK: https://github.com/ananditaa2/weather_app

Achievements

Won 2nd prize in the Project Development Competition held at SSIPMT IDEA Lab on 10th July 2025.
