Phone No. : +91 8602985667

2nd Year Bachelor of Technology – Specialization in Artificial Intelligence and Machine Learning at Shri Shankaracharya Institute of Professional Management & Technology (SSIPMT), Raipur Duration: 2024–2028

PORTFOLIO: <https://ananditaa2.github.io/portfolio/>

Education

CPI – 8/10

12 th (Holy Cross S.S. School,Kapa)	2023
CBSE Board(PCM + CS), 74.4%	
10 th (Holy Cross S.S.School)	2021
CBSE Board, 83.2%	

Technical Skills

Strong: Python, C++, Data Structures & Algorithms, Frontend, UI/UX, AI

Intermediate: FastAPI, React, OpenCV, Machine Learning,

Tools: Git/GitHub, VS Code, Jupyter Notebook

Problem Solving

*Solved **250+ DSA problems** on CodeChef

*Strong in **Arrays, Strings, Recursion**

Projects

PrithviNet | Real-Time Environmental Monitoring & Compliance

React, FastAPI, AI/ML Models, WebSockets * Developed a comprehensive "AI-first" system to monitor environmental metrics in real-time, moving beyond static data to active compliance tracking.

- Engineered a high-performance dashboard using **React** and **FastAPI** to visualize live sensor data and environmental KPIs.
- Integrated AI components to predict potential compliance breaches, enabling proactive rather than reactive environmental

Demo Cafe Website

A modern and responsive cafe website with aesthetic UI, smooth user experience, and mobile-friendly design. Built to showcase a stylish digital presence for cafés and coffee brands.

Live Demo: <https://cafe-style-ui.vercel.app/>

Github Repo: https://github.com/ananditaa2/demo_cafe_website

Hand Tracking System (computer vision)

A computer vision-based hand tracking application developed using Python, capable of detecting and tracking hand gestures in real time. Useful for gesture control, AI interaction, and human-computer interface projects.

Source Code: <https://github.com/ananditaa2/hand-tracker>

Job-Coach-AI

AI-Powered Career Optimization Vite, TypeScript, LLM APIs (OpenAI/Gemini), AMD Slingshot Integration * Built an intelligent placement dashboard featuring an automated resume rewriter powered by Large Language Models (LLMs). • Developed agentic workflows to parse complex job descriptions and provide context-aware resume tailoring and interview preparation. • Leveraged Vite and TypeScript for a modern, type-safe frontend, ensuring a high-speed and responsive user experience.
